EXPERIENCE

Backend Software Engineer, Snotor   **May 2024**

- Review and estimation of new leads and projects
- Developing API and tech. documentation
- Created landing page and product relase page with the ability to sign up for the mailing list
- Leading tech meetings and demo meetings with clients
- Working on a social media app with messaging capabilities

Technologies: Nest.js, Typeorm, PostgreSQL, Jest, React.js, TypeScript, Docker

Full Stack Software Engineer, Tastewise   **Feb 2022 — Dec 2023**

- Developed an API and tech. documentation that was sold to multiple clients for commercial use. Covered API by unit, functional, smoke, and E2E tests using Mocha(and Chai) and Jest
- Refactored multiple parts of the system to improve the readability, sustainability of the code and response speed
- Was one of main proponents of move to Typescript. Migrated multiple APIs from JS to TS, improving code security and reliability
- Helped create CI/CD cycle by writing Github actions for it.
- Mentored peer engineers on back-end development and best practices
- Developed wizard and dashboard features, which were used to develop multiple other features on top of that functionality.
- Led multiple features development, from planning and estimation, to completion of finished products.
- Engineered a module facilitating the utilization of the latest version of Midjourney through Discord integration.
- Orchestrated the development of a Microsoft bot from inception to deployment.
- Spearheaded the development of a diverse range of AI features within the company, including a chatbot for navigation and Q&A, as well as the creation of packaging ideas and blog posts.

Technologies: Angular, RxJs, NgRx, Javascript, TypeScript, SCSS, Jest, Mocha/Chai, Node.js, Elasticsearch, MongoDB, Docker

Full Stack Software Engineer, ItFin   **Nov 2019 — Dec 2021**

Was involved in this startup from the day 1, helped to build it from the ground up and was involved in the development of every part of the system

- Implemented both frontend and backend parts for 20+ business and company metrics and reports
- Helped develop Google Chrome extension for this application
- Wrote documentation for developers for both frontend and backend parts of the system, easing the onboarding process of new developers.
- Created jest tests and swagger validation/documentation for multiple parts of the system to improve the reliability of the system

Technologies: Vue, Vuex, SCSS, Jest, Javascript, Koa.js, Node.js, SQL Databases, Chrome Extensions

SKILLS

- Languages: HTML, CSS, JavaScript, Typescript
- Frameworks: Node.js, Nest.js, Vue.js, Angular, Nuxt.js, Vuex, Bootstrap, Jest, Rx.js, NgRx
- Testing: Jest, Mocha, Chai
- Tools: Docker, Redis, SQL, AWS, Puppeteer, Storybook, Shell, Git
- Databases: SQL Databases, MongoDB, Elasticsearch
